

HAND HYGIENE

DESIGNED FOR THOUSANDS OF HANDS

A public restroom has to work – even for visitor number 1,000. That's why our dispensers are designed to be used again and again. They are touch-free, efficient, and gentle — both on hands and on the environment. Designed for everyday use, for routines, and for places where many people pass through — but only stay for a few seconds.

Create a visual impact with your dispensers. Whether you want to encourage better hygiene, send a message to users, or feature your logo, a dispenser only succeeds if it actually gets used.

Colours make a difference. Choose dispensers and stands in your company's colours to match your interior. A wide range of stands and dispensers can be custom-painted in all classic RAL colours, so function meets design.

We believe the increased focus on hand hygiene is here to stay. That's why durable products that can handle heavy usage in busy stores, workplaces, and attractions are absolutely essential.

The soap dispenser and hand dryer should work. Even after thousands of hands

Hygiene solutions — designed to be used
